

# MUHAMMAD UMAR

## 3D ARTIST & ANIMATOR

An experienced animator and 3D artist who is passionate about using creativity to bring ideas to life. With six years of dedicated experience using Blender, I've created infinite renderings and more than 150 stunning product animations for a range of businesses.

I'm an expert in 3D animation, modeling, texturing, lighting, rendering, rigging, sculpting, and simulations, among other aspects of 3D design. I have the skills to turn any idea into an engaging visual reality, regardless of how complex the character movements are or how complex a simple bottle is.

By selecting to work with me, you're employing a one-man army committed to producing excellence in all facets of the creative process rather than just a 3D artist. Together, let's transform your concepts into breathtaking, immersive experiences!
